

SBQ Emulsion

Textile Emulsions

Aquasol HV

Fast Exposing; outstanding resolution and definition. Print Plastisol, Waterbase*, or Discharge** inks with confidence. Excellent coating; sharp durable stencils.

Aquasol HVP

Same great qualities as Aquasol HV but in a light red color for more contrast, easier registration. Prints Plastisol, Discharge**, and Waterbase* inks easily.

Aquasol TS

Outstanding Durability, fast exposures, excellent detail. Prints Plastisol, Discharge**, or Waterbase* inks. Premium SBQ Textile Emulsion, strong sharp stencils.

Photocure TXR

Fast exposures. Strong durable stencils. Excellent image to print contrast for easy set up. Prints Plastisol, Discharge**, and Waterbase* ink systems.

Photocure BLU

Excellent detail and resolution. Coats easily. Durable stencils. Exposes well on a variety of exposure systems. Good choice for manual printer or automatic shop.

Dual Cure Emulsion

SP-7500

Premium Dual Cure Textile Emulsion. Excellent resolution and definition. Wide exposure latitude; easy to develop; flexible stencil. Plastisol, Discharge**, and Waterbase*.

Photocure DX

All purpose Textile and Graphic Emulsion. Prints a variety of inks and substrates. Excellent definition and resolution. Sharp durable stencils. Multipurpose emulsion.

Diazo Emulsion

SP-300

Economical diazo emulsion. Excellent resolution and detail. Very durable stencils. Prints Plastisol, Waterbase*, and Discharge** inks.

Emulsion Comparison

- SBQ** Fast Exposures • Premium emulsion • Pre-sensitized.
- Dual Cure** Wide exposure latitude • Flexible stencils • Sharp detail.
- Diazo** Economical emulsion • Durable • Water resistant.

* Murakami recommends diazo additive for waterbase ink systems.
 ** Murakami recommends diazo additive and MS or A&B hardeners for discharge ink systems.

SBQ Emulsion

Graphic Emulsions

One Pot Sol C

Murakami's Premium Emulsion. Finest resolution and definition for critical tolerance printing. Universal graphic and commercial printing emulsion. Fast exposures.

Photocure SR

Fast Exposing large format graphic emulsion. Better image to substrate contrast. Excellent resolution and definition. 1:1 resolution of art. Durable press life.

Dual Cure Emulsion

Photocure PRO

Murakami's newest emulsion. Dries very fast, humidity resistant, and exhibits low surface tack. Excellent choice for large format graphic and industrial printing.

Photocure GFX

Excellent graphic emulsion. Durable sharp stencils with excellent resolution and definition. Large or small format graphic/industrial printing. Prints a wide variety of inks.

SP-9500

Murakami's premium dual cure graphic emulsion. Excellent solvent resistance. Wide variety of print applications. Strong durable stencils. Excellent detail.

Specialty Emulsions

MSP-2

Excels at electronic circuit printing. Adheres well to stainless steel and polyester mesh. Thick film applications. Can be coated to 1000 microns. Great mesh adhesion.

One Pot DLE

DLP exposing emulsion. Large format graphics superstar. Fast exposing. Prints UV, Solvent and water thinnable UV inks. Also prints waterbase* inks for flag and banners.

One Pot SUPER

Projection emulsion. Extremely sensitive for projection exposure systems. Designed for large format graphic printing. Prints UV and solvent based inks.

Inks:

- P** Plastisol
- S** Solvent
- W** Waterbase*
- UV** UV Ink
- D** Discharge**
- UV, W** Water Thinnable UV Ink

Print Type:

- T-shirt** Textile
- G** Graphics
- E** Electronics
- P** Projection
- dlp** DLP Exposure
